

# Ornamental Ridge & Finials

**We produce a comprehensive range of ornamental ridge to complement new roof construction or to refresh older buildings**

These ridge are a two piece bonded product neatly finished and coloured to suit any application. We produce the standard cocks comb, three hole, three hole club and fleur de lys. To add to this we also manufacture a range of our own standard patterns including dry fix. A limited stock is available but most are made to order, although we pride ourselves on quick order turnaround and quality of product.

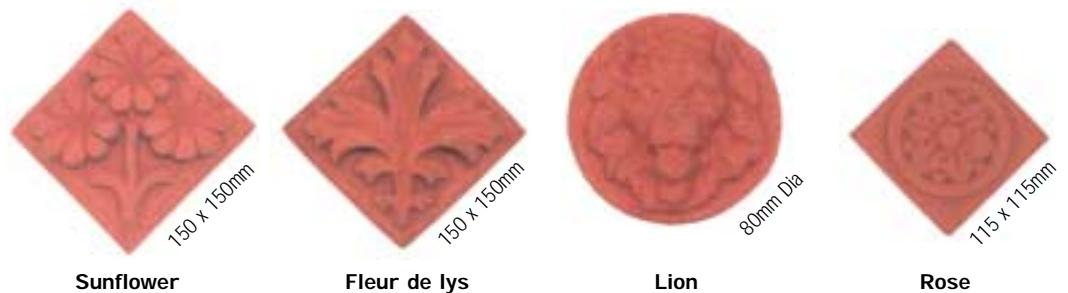

## Crested Ridge

On the left is our standard pattern range of crests. But if you require something different we are happy to discuss the reproduction of obsolete crests or other profiles to meet your requirements. All ornamental ridge can be produced to match any of our ridge profiles and colours.

## Decorative Block Ends

We have a small range of decorative panels for standard block end ridges, which can be coloured to match or to provide an interesting contrast to the main ridge.

## Finials

To fit alongside our ornamental ridge we produce a selection of finials and scrolls. These finials will enhance any ornamental roof or look equally as good as a stand alone finishing piece. All finials are two or more parts bonded together and finished to a high standard and can be coloured to match most requirements. Again we are happy to discuss the repair or reproduction of many obsolete or unusual finial designs, for more information contact our technical sales team.

COMPONENT	Fleur de lys top	Plain Stem	Twisted Stem	Small ball finial	Short ball top finial	Tall ball top finial	Large ball top finial	Small base	Large base	Scroll finial
